

I am Sasank Rajeev Varma, from Vijayawada, Andhra Pradesh. I am currently studying 3rd year B.tech, Computer Science. I did my Schooling from Dr K.K.R's Gowtham High School, Vijayawada. My interest towards Mathematics made me choose MPC in my intermediate. My chances after Intermediate is either join Amrita(Rank:1858) or join college in college based on EAMCET(Rank:4958). So I thought Amrita would be better. I didn't have any specific interests towards any branch, and as my brother suggested Computer Science is closely related to math, I choose Computer Science.

My father works in Doordarshan, and my mother is a home maker. My brother works for Samsung.

My favourite subject is design and analysis of algorithms and my grade in that course is 'A'.

I want to know about different phases of building a software.
